## **6. PREVENTING RESISTANCE IN URUGUAY**

Amalia Rios, INIA La Estanzuela; Roberto Fontaina, Bayer Crop. Science.

### Summary

In the present work we analyze the risk of resistance occurrence in different productive areas in Uruguay, the use of Glyphosate, the activities performed to prevent resistance appearance. We also describe different on-going projects, the risk situations and the need to elaborate protocols and a legal frame in the case of resistance occurrence.
