AGROCLIMATOLOGÍA

INFORMACIÓN CLIMÁTICA

R. Méndez¹, Matías Oxley², J. Furest³

INIA Treinta y Tres obtiene información agroclimática para el área de influencia de la Estación Experimental a partir de una estación instalada en el año 1972. El objetivo de ésta es el de obtener información detallada de clima y hacerla disponible para los diferentes proyectos de investigación.

Todos los días se registran a las 9 y 15 horas los siguientes datos:

- Temperatura al abrigo (máxima, mínima y media)
- Temperatura de suelo cubierto y desnudo (máxima, mínima y media)
- Temperatura mínima sobre césped
- Humedad relativa
- Evaporación: Piché y Tanque “A”

La información se procesa diariamente, se realizan los cómputos de las bandas y los datos se resumen cada 10 días y mensualmente, quedando así elaborados para el uso de los diferentes Proyectos y en la página web de INIA (www.inia.org.uy). A partir del año 2009 la información está en la web en forma diaria.

Para esta publicación, se presentan los datos mensuales de los parámetros climáticos detallados anteriormente:

- Zafra anterior julio 2010 - junio 2011 (Cuadro 1).
- Última zafra julio 2011 – junio 2012 (Cuadro 2).
- Promedios de la Serie Histórica julio 1973 – junio 2012 (Cuadro 3)
- Precipitación
- Heliofanía
- Radiación solar
- Movimiento del aire, viento a 2m.
- Nubosidad
